WHY STILETTO® TITANIUM HAMMERS?

POWERFUL

Titanium delivers 97% of your swing energy to the nail compared to 70% with steel hammers. Get more done with less effort.

PAINLESS

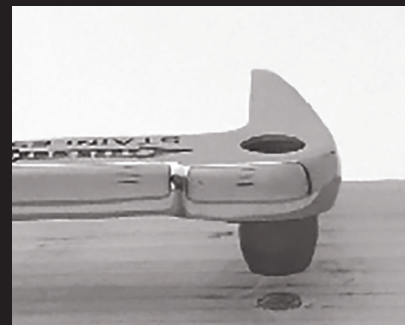

Titanium provides 10 times greater dampening of damaging recoil shock vibration than steel. Less recoil means less pain.

LIGHTWEIGHT

Titanium weighs 45% less than a steel hammer of similar size. Less weight means less fatigue at the end of the long workday.

Patented replacement steel face & 180° nail puller on TI-BONE™ hammers only

Patented DIMPLER™ feature on nail puller model only

STILETTO® TECHNOLOGY

STILETTO® Titanium Tools are designed to reduce the harmful effects that nailing and prying can have on your body. STILETTO® has combined the latest materials, patented technology & design innovations to create new tools that enable you to work safer, faster and easier.

Visit stiletto.com to review our full line of hammers & bars, accessories, replacement parts & gear. Click around to find a decade of press reviews & user testimonials, product development videos, user pics, FAQ page, part replacement instructions, and a distributor locator, all online.
